PROFILE

A skilled Full Stack Developer with expertise in building scalable and user-friendly web applications. Proficient in **TypeScript**, **JavaScript**, **Python**, **HTML**, and **CSS**, and experienced with modern frameworks such as **React.js**, **Next.js**, **Vue.js**, and **Angular**.

Specialized in server-side development using **Node.js**, **PostgreSQL**, **MongoDB**, and **Drizzle ORM**. Adept at creating responsive and interactive user interfaces with **Framer Motion**, **TailwindCSS**, and **Shadcn**.

Strong foundation in **UI/UX**, with a focus on performance optimization, problem-solving, and debugging to ensure application reliability. Skilled in integrating **RESTful APIs**, improving **SEO**, and maintaining clean code with **Git** and **GitHub**.

A proactive team player with experience in project management, collaboration, and delivering high-quality, innovative solutions.

EMPLOYMENT HISTORY

Full Stack Developer, Remote

- Developed and delivered scalable web applications tailored to client requirements, utilizing frameworks like **React.js**, **Next.js**, and **Vue.js** to create engaging and user-friendly interfaces.
- Built and maintained RESTful APIs with **Node.js**, **PostgreSQL**, and **MongoDB**, ensuring seamless backend operations.
- Enhanced client websites' performance and visibility with **SEO optimization** and efficient debugging practices.
- Implemented custom animations and interactive elements using **Framer Motion** to elevate user engagement.
- Leveraged **TailwindCSS** and **Shadcn** to create responsive, visually appealing designs aligned with modern UI/UX principles.
- Collaborated with clients to define project scopes, timelines, and deliverables, ensuring client satisfaction and on-time delivery.
- Provided optimization solutions to reduce load times and improve overall application performance.

OPEN SOURCE CONTRIBUTIONS

- PowerToys (Microsoft)**: Added a new feature to enhance functionality.
- Create T3 App (T3 OSS)**: Fixed a bug to improve app stability.
- UI.jln.dev (jln13x)**: Fixed bugs and improved UI performance.

WORK ON THESE PROJECTS

- **Art-Gale-Studios**: Features **Framer Motion** animations, **Advanced SEO**, **SVG morphing**, and more.
- **chat-app**: Chat app built with **Upstash | Redis**, **Next Auth**, **Pusher**, **axios**, and **zod**.
- **Own App**: A modern application featuring a **Framer Motion** logo animation that provides a fluid, visually engaging experience for users.
- **Win11 Clone**: A **Windows 11** clone built with **Next.js**, **Framer Motion**, **Tailwind CSS**, and **Shadcn**, offering a responsive and interactive user interface that replicates the look and feel of the Windows 11 operating system.

MarkDown | MD | MX, Blog

- **odocs**: Server-Side Markdown Compilation in **Next.js** (**try demo** with GitHub hosted files)
- **odox**: A modern blog built with Next.js App Router, rendering MDX content using **Contentlayer**. *(Generate all Posts at Build time using **Contentlayer**)

Packages

- **shadcn-theme-editor**: user-friendly tool designed to simplify the process of managing and customizing theme colors in Shadcn-based projects.
- **emittor**: State management using custom hooks without wrapping components using Providers.

Others

- **Other Repos**
- *Note: Many projects are developed and maintained as part of freelance work, so they are not included here.*
